## Summary

Finding creative solutions to problems is something I have always enjoyed. As a kid I loved tinkering with things that were broken, figuring out how they worked, and fixing them again. When I finished high school, I knew exactly what I wanted my career to be.

I am currently in 2nd year and pursuing my B Tech degree in the field of computer science at KIET Group of Institutions, where I have learned how to apply critical thinking and problem-solving strategies to today's complex problems.
